

APPLICATION INSTRUCTIONS FOR REUSABLE DECALS

We at G+R POSTERS-PARTS-SUPPLIES would like you to enjoy and keep this product for a long time, so it is **IMPORTANT** that you follow these instructions carefully.

IMPORTANT! Do not get the backing paper wet at any time before removing the vinyl! This **WILL** damage the Decal.

Please be sure to have the following items at hand when you are ready to install your Decal

1. Roll of paper towel
2. Spray bottle filled with water and 1 or 2 drips of liquid soap
3. A plastic squeegee or credit card
4. A utility knife or razor blade

STEP 1

STEP 2

STEP 3

Clean the window well. Make sure there is no selotape or other items on the window.

Take off the backing paper and throw away. **DO NOT GET THIS PAPER WET WHILE THE DECAL IS STILL ON**

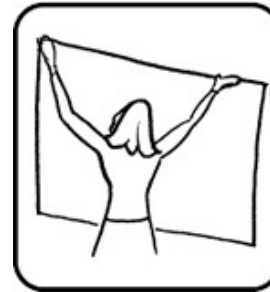

Then spray the window well with the liquid. The wetter the better.

STEP 4

It should now be possible to slide the Decal around the window for exact positioning. If not then apply more water to the underside of the Decal.

STEP 5

Now wet the Decal both sides and apply to the window.

STEP 6

When happy with the position spray more liquid to the back of the Decal.

STEP 7

Now you are ready to use your squeegee or credit card. Start from the centre and work the air and the water out to the edge. Repeat this until you have removed all the air and water bubbles. If the edges appear to be wavy or wrinkled do not worry just allow the window to dry for an hour then squeegee back down dry.

Now if you are happy with the position wipe down the back with a paper towel and clean up the window area. It takes anything from 3 - 7 days for the remaining water to evaporate depending on the conditions. The Decal is now firmly on your window until you want to remove it. When removing, do so slowly as not to stretch the Decal. And remember to roll it up.
